Sequence 4866, Application US/10767701
GENERAL INFORMATION:
APPLICANT: Kovalic, David K.
APPLICANT: Cao, Yohwa
TITLE OF INVENTION: Nucleic Acid Molecules and Other Molecules A.
TITLE OF INVENTION: Plants and Uses Thereof For Plant Improvement FILE REPERENCE: 38-21/53535)B
CURRENT APPLICATION NUMBER: US/10/767,701
CURRENT FILING DATE: 2004-01-29
NUMBER OF SEQ ID NOS: 63128
SEQ ID NO 4866
LENGTH: 666

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        g                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ઠે
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ઠે
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Š                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             (570)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            g                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              엄
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    à
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               d                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 5839                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          308                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  엄
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   dd
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           셤
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           임                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ठ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Š
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 8
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ઠે
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        à

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      4                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Conservative

WPI; 1999-081276/07. P-PSDB; AAW90251. New catalytically active subunit of human telomerase - used in modulation of telomerase activity, particularly for treating α ageing

Claim 4; Fig 1; 76pp; German.

This sequence encodes a novel human catalytic telomerase sub-un

i protein can be used in screening assays to identify of telomerase and to treat or inhibit cellular disorders, etts and/or other pathological processes involving telomerase, y cancer and ageing (also suitable for this are agents that inhibit or mimic the activity of the subunit). Antisense ds inhibit telomerase action (by binding to specific mRNA), y in neoplastic cells and may be expressed in vivo. Antibodies is of the protein, used as probes or primers, are used to lomerase-related conditions (especially neoplasia) by (i) bnormal levels of the subunit protein in body fluids or (ii) by measuring the amount of the encoding nucleic acid of the nucleic acid encoding the subunit mRNA is confined to s, in contrast to the ubjquitous expression of the telomerase

combinant human Telomerase Reverse Transcriptase and its are useful in the diagnosis, prognosis and treatment of cell on conditions especially cancer and ageing.

Fig 74; 387pp; English.

sequence encodes human telomerase reverse transcriptase ch is a ribonucleoprotein. The present invention also he following methods: (A) determining whether a test compound tor of hTRT, by detecting the change in hTRT recombinant polynucleotide, on administration of the compound; (B) to recombinant telomerase by contacting a protein preparation in a telomerase RNA component; (C) detection of the hTRT RNA or a sample by binding a relevant probe to the sample and correlating the presence of complex or amplification; he complex formed or in the case of RNA detection, amplifying and correlating the presence of complex or amplification; on of a vertebrate cell by increasing hTRT expression; and (B) an agent that causes an increase in cell vertebrate cell in the that causes an increase in cell vertebrate cell in the formation of hTRT and the polynucleotide encoding hTRT can be used in itture of medicaments for inhibiting the effect of ageing or libitors of telomerase activity can be used to treat conditions isociated with high telomerase activity. A protein preparation also be used in the new methods

The present sequence encodes the catalytic subunit of a human the holoenzyme. Disruption of the telomerase gene alters telomere maintenance. The DNA is essential for telomerase activity, and protein is physically associated with telomerase and a constituction telomerase complex. The products can be used for increas reducing the lifespan of cells such as cancer cells or transformation, calls with a longer lifespan can be transplanted into grafted onto an individual (e.g. as skin grafts, as systems for therapeutic proteins, such as hormones and enzymes), to whom provide therapeutic benefit.

New isolated human telomerase catalytic sub-unit gene - used to products for increasing or reducing the life span of cells such cells or transformed cells.

```
The present sequence is that of hTERT CDNA in plasmid pGRN121. the catalytic subunit of human telomerase. Claimed immortalised lines for use in vaccine production are adapted to express hTER Suitable cell lines comprise human diploid fibroblasts, e.g. MR W138 cells, transfected with hTERT cDNA or infected by a retrov carrying hTERT cDNA, and are capable of supporting antigen prod method for preparing such cell lines using recombinant techniqu
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Novel hTERT-immortalized cell line (human telomerase reverse transcriptase) useful for human vaccine production and preparat antigen, such as a virus or virus-derived agent.

The cell lines are also used as a diagnostic test for the fa virus, such as human cytomegalovirus, and to determine the antiviral agents by testing the capability of a modified aining a reporter gene to infect the cells. The cell lines have fy which can be impaired in cell lines immortalised by other being able to support viral replication. The cells remain cally suitable for viral/vaccine cultivation 125 365 138 185 198 245 258 305 318 378 425 438 485 498 545 558 618 665 678 725 738 785 798 845 65 78 3GCAGCGCTGCGTCCTGCTGCGCACGTGGGAAGCCCTGGCCCCGGCCACCCCGGCGATG CGCAGCGCTGCGTGCTGCGCACGTGGGAAGCCCTGGCCCCGGCCACCCCCGCGATG CACACACTCCCCGCTGCCGAGCCGTGCGCTGCTGCGCAGCCACTACCGCGAGGTG CGCGCGCTCCCCGCTGCCGAGCCGTGCTCCCTGCTGCCGCAGCCACTACCGCGAGGTG 1GCCGCTGGCCACGTTCGTGCGGCGCCTGGGCCCCAGGGCTGGCGGCTGGTGCAGCGC reccectigecacaticated against the contraction of th searcccecceccecriticcececrecrescecccaseccresistes searccceccecriticcecccccacrecrecrecrecrecred zaceccecececececececererrececeaererecreeresere CCCGAGTGCTGCAGAGGCTGTGCGAGCGCGCGCGAAGAACGTGCTGGCCTTCGGCTTC CCGAGTGCTGCAGAGGCTGTGCGAGCGCGCGGAAGAACGTGCTGGCCTTCGGCTTC ACCTGCCCAACACGGTGACCGACGCACTGCGGGGAAGCGGGGCGTGGGGGGCTGCTG 3CCGCGTGGGCGACGTGCTGGTTCACCTGCTGGCACGCTGCGGCGCTCTTTGTGCTG GGCTCCCAGCTGCGCCTACCAGGTGTGCGGGCCGCCGCTGTACCAGCTCGGCGCTGCC CAGGCCCGGCCCCCCCACACGCTAGTGGACCCCCGAAGGCGTCTGGGATGCGAACGG Gerracridandeseccesseseseccessesesecrirencaccaccasseses CTGGAACCATAGCGTCAGGAGGCCGGGGTCCCCCTGGGCCTGCCAGCCCCGGGTGCG BARGCCCCGGGGCAGCCAGCCGAAGTCTGCCGTTGCCCCAAGAGGCCCCAGGCGTGGC TIGCCCCTGAGCCGGAGCGGACGCCCGTTGGGCAGGGGTCCTGGGCCCCACCGGGCAGG Gaps 36; DB 6; Length 4070; BP; 670 A; 1383 C; 1296 G; 721 T; 0 U; 0 Other; 1; Indels Score 3933.4; Pred. Human telomerase is a target for and treating diseases relating to cell proliferation and such as cancer, or for increasing the proliferative capacity A claimed method for increasing the proliferative capacity of e cell, especially a human or other mammalian cell, involves into the cell a recombinant hTRT polynucleotide encoding an it into the cell a recombinant hTRT polynucleotide encoding an it in which residues 195.200-333, 200-323, 192-271, 200-271, 222-0, 192-323 and 415-450, or 192-271 and 415-450 are deleted. A hod for reducing telomerase activity in a cell involves a recombinant polynucleotide encoding an hTRT variant having of amino acids 192-460, 560-565, 637-660, 638-660, 748-764 or The polynucleotides are obtained by mutagenesis of the hTRT 3871 3960 GCCAGCTTTTCCTCACCAGGAGCCCGGCTTCCACTCCCCACATAGGAATAGTCCATCC 3780 AGATTCGCCATTGTTCACCCCTGCCCTGCCTCCTTTGCCTTCCACCCCCACCATCC 3840 CTGTACACAGGGAGGACCCTGCACCTGGATGGGGGTCCCTGTGGGTCAAATTGGGGG 3931 nucleotide sequence of cDNA encoding human telomerase reverse GTGGAGACCCTGAGAAGGACCCTGGGAGCTCTGGGAATTTGGAGTGACCAAAGGTGTG creracacaccaseaccerecaceresareseserecereresarresess AGAITCGCCATTGTTCACCCCTCGCCCTGCCCTTCTTTGCCTTCCACCCCCACCATCC GGTGCTGTGGGAGTAAAATACTGAATATATGAGTTTTTCAGTTTTTGAAAAAA 3986 GGTGCTGTGGGGGTAAATACTGAATATATGAGTTTTTTCAGTTTTTGAAAAAA 4015 ic polypeptide and polynucleotide, useful for increasing ctivity in a cell. reverse transcriptase; human; hTRT; cell proliferation; erase reverse transcriptase (hTRT) cDNA Location/Qualifiers 56. .3454 andard; cDNA; 4015 BP 2; 24pp; English. 99WO-US007097 98US-00052864 98US-00128354 (first entry) /*tag= 10842/52. omerase reverse transcriptase; TRT; T lymphocyte activation; cell; telomerase activity; cancer cell; proliferating cell; cal destruction; telomerase; cancer; proliferation disease; ss.

GS.

The present sequence encodes a human telomerase reverse transc (TRT) polypeptide. The protein is used in the method of the ir The specification describes a method for activating a T lymph comprising contacting the T lymphocyte with a dendritic cell t expresses a TRT peptide in the context of a MHC class I or MHC molecule. The protein causes induction of an in vivo immunolog response to telomerase activity. Cancer cells are characterize expression of endogenous TRT gene and the presence of detectal telomerase activity. Therefore, by eliciting a specific immune to TRT or to TRT or to TRT-expressing cells, it is possible to selective proliferating cells for immunological destruction. The method celliciting an in vivo immune response to telomerase by activatic lymphocyte, and is useful for prevention and treatment of canceller proliferation diseases/conditions treatm "telomerase reverse transcriptase" Eliciting an in vivo immune response for prevention and Location/Qualifiers 56. .3454 Disclosure; Fig 2; 26pp; English. 99WO-US006898. 98US-0112006P. /*tag= a /product= WPI; 1999-610845/52. The method is useful for detecting ce of beta-region (a 182 nucleouide region consisting of exons f the hTERT-mRNA in a human sample for diagnosis and prognosis. The method provides an accurate measure of telomerase activity vely measuring mRNA that encodes an active hTERT protein
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ag expression of mRNA encoding hTERT, the catalytic subunit of , as an indicator of cancer, by amplifying RNA using primers ary to hTERT gene sequence and quantitating amplified products.

The invention relates to animal tissues with carbohydrate anticare compatible for transplantation into human patients. The malecall is inactivated homozygously for expression of alpha(1,3)g transferase (alpha1,3CT) gene and comprises a transgene for all fucosyltransferase (alpha1,2FT). It is useful for producing an with carbohydrate antigens that are compatible for transplants human patients. The present sequence is human telomerase revertranscriptase (TERT) cDNA used in the invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Mammalian cells, useful for producing animal tissues with carbantigens that are compatible for transplantation into human pa
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             GCAGCGCTGCGTGCTGCGCACGTGGGAAGCCCTGGCCCCGGCCACCCCGG

related human DNA

cancer cell discrimination; gene;

Discrimination of a cancer cell in a sample tissue, comprises the expression level of a reverse transcriptase component of t

ũ

The present invention relates to a method for the discriminatic cancer cell in a sample tissue, which involves determining the level of a reverse transcriptase component of telomerase in a constituting the sample tissue by an in situ hybridization of the enzyme, and judging a cell showing a higher expression lever that of the reverse transcriptase component of telomerase in a cell to be a cancer cell. The present sequence is a human DNA exemplification of the invention

e-stranded short interfering RNA having sense and antisense ds which are complementary to each other and to target nucleic telomerase RNA or mRNA encoding telomerase reverse .e-stranded short interfering ds

Fig 3A-B; 37pp; English.

sequence is that of human telomerase reverse transcriptase

The invention relates to the discovery that double-stranded
KNAs, such as short interfering RNAs (siRNA), which target
KNA or TERT mRNA are capable of inhibiting telomerase
Thibition of telomerase in cancer cells leads to telomere
end-to-end chromosomal fusion, and apoptosis. Interference of
activity can also be used for treatment of infertility, for
on or sterilisation, for immunosuppression, for treatment of
site and fungal infections, and in antiinflammatory therapies.
Ise is active in a limited number of cell types, e.g. tumour
line cells, certain stem cells of the haematopoietic system, T
s, sun-damaged skin, and proliferative cervix, most normal
lot affected by telomerase RNA interference therapy

sic acid encoding or comprising interfering RNAs which target RNA, useful for inhibiting telomerase activity for treating sertility and disorders of the immune system.

Fig 3; 52pp; English

sequence is that of human telomerase reverse transcriptase

1. The invention relates to the discovery that double-stranded
1 RNAs, such as short interfering RNAs (sirkN), which target
RNA or TERT mRNA are capable of inhibiting telomerase
Inhibition of telomerase in cancer cells leads to telomere
end-to-end chromosomal fusion, and apoptosis. Interference of
activity can also be used for treatment of infertility, for
on or stearilisation, for immunosuppression, for treatment of
site and fungal infections, and in antiinflammatory therapies.
Ise is active in a limited number of cell types, e.g. tumour
aline cells, certain stem cells of the haematopoietic system, 7

s, sun-damaged skin, and proliferative cervix, most normal
ot affected by telomerase RNA interference therapy

"human telomerase reverse transcriptase" Location/Qualifiers 56. .3454 /*tag= a /*tag= a /product=

Composition for treating wounds and enhancing epithelization c surface, comprises vector encoding telomerase reverse transcri telomerized epithelial cells on a microparticle or a matrix. comprising a vector encoding telomerase reverse transcriptuse an excipient or device, or comprises telomerised epithelial comprises telomerised epithelial comprises telomerised epithelial comprises telomerised epithelial compression administration administration administration to a wound site. [1] has vulnerary and antiulos activities and can be used to promote epithelial cell migratic useful for treating a wound and enhancing epitheliation of a surface. The wound is sepecially skin wound including acute last transmatic lesion, burn, or surgical incision, chronic lesic chronic venous ulcer, diabetic culcer or compression ulcer and is further monitored for closure. The telomerase activity or I expression is increased in epithelial cells at the site of tre also in fibroblates or endothelial cells at the site of treatmepithelial cells are especially keratinocytes. A polynucleotid TERT is useful for the preparation of a medicament for treatme wound or an epithelial surface in a human or animal. An epithe with increased telomerase activity or increased expression of useful for preparation of a medicament for the treatment of a human or animal. (I) is also useful for treating wounds of oth epidermal surfaces including mucosal surfaces such as bronchus nose, oesophagus, stomach, or intestine. The present sequence human TERT (ATERT), which is given in the exemplification of t invention. hTERT is located to chromosome 5 present invention describes a pharmaceutical composition Disclosure; Page 31-32; 68pp; English GB; 09-MAY-2001; 2001US-0289903P Harley WPI; 2003-120591/11. and maintain adipogenic capacity of the cell. This sequence the gene encoding the TRRY protein. The cell strain can be search to study all aspect of adipogenesis, especially in presearching treatments for e.g. obseity. The cell can also be suiffy adipogenesis modulators for use as therapeutic agents money, growth factors, cytokines, enzymes, cholesterol binding sholesterol removing proteins or their combinations.

The control of the co

transcriptase cDNA

reverse

merase

t sequence encodes for human telomerase reverse transcriptase is is the catalytic protein component of telomerase and is also os hEST2. This correlates with cell proliferative capacity, tality, and the development of a neoplastic phenotype. Human nse oligonucleotides are useful for diagnostic or prognostic ns to telomerase related conditions, including cancer. They are and activity 127 human telomerase reverse transcriptase used 9 67 CB; CAGCGCTGCGTCCTGCGCACGTGGGAAGCCCTGGCCCCGGCCACCCCCGCGATGCC CAGCGCTGCTCCTGCTGCGCACGTGGGAAGCCCTGGCCCCGGCCACCCCCGGCGATGCC CGCGCTCCCCGCTGCCGTGCGCTCCCTGCTGCGCAGCCACTACCGCGAGGTGCT Gaps merase reverse transcriptase, hTRT; telomerase, hEST2; protein component; cell proliferative capacity; tality; neoplastic phenotype, diagnostic application; application; telomerase related condition; cancer; c agent; telomerase expression; telomerase activity; ds.
